WORK EXPERIENCE

Hogarth Australia,

Greater Sydney, Australia — *Frontend Web Developer*

JAN 2020 - Present

- Localized and maintained web pages for the Australia and New Zealand market for one of the biggest global tech companies.
- Ensured cross-browser compatibility, web accessibility, and responsive design according to the brief and requirements from the client while also meeting tight deadlines.
- Developed electronic direct mails (EDMs) that were sent out to millions of customers.
- Assisted lead developer in building an internal web application to improve producers workflow efficiency.
- Conducted training and on-boarding new developers to ensure consistent coding standards and following client's guidelines.

Hogarth Worldwide,

Sunnyvale, CA — *Frontend Web Developer*

AUG 2019 - DEC 2019

- Maintained client digital assets using clean, accessible mark-up according to the latest web standards.
- Coordinated with interactive producers, project managers, graphic production artists, copy editors and QA for the web pages implementation.
- Used SVN for Version Control and client's proprietary project management tools to collaborate with other developers and stakeholders.
- Investigated and resolved QA tickets through the communication with the QA team.

Center for Inherited Blood Disorders,

Santa Ana, CA — *Wholesale Program Coordinator*

JAN 2017 - AUG 2019

- Built a web application to parse csv files and generate inventory, chargebacks, and sales reports.
- Worked closely with the cloud ERP system vendor to customize the wholesale system.
- Built pharmacy order templates using excel formulas to help improve workflow efficiency and accuracy.
- Created wholesale training instruction modules to facilitate fellow coworkers and new trainees.
